Re: City of Carmel, City Center Drive and Veterans Way Roundabout

Dear Resident,

The City of Carmel has an ongoing commitment to updating, improving and maintaining the City's infrastructure and transportation assets. As part of that mission, there is a new project directly affecting you as an adjacent stakeholder of the project. The project includes, but is not limited to, the construction of a new roundabout at the intersection of City Center Drive and Veterans Way, installing new storm sewers, water main, sanitary sewer, communications conduit, new full depth asphalt pavement, curb, decorative and concrete sidewalks, asphalt path, lighting, and raised crosswalks within the right-of way.

This project is anticipated to begin under partial road closure April 10, 2023, with an expected completion date of June 30, 2023. Work prior to the anticipated partial closure date is permitted but limited to areas not disrupting the daily flows of traffic and this work could begin as soon as March 21st. Construction will take place on City Center Drive east of 3rd Avenue SW and west of S. Range Line Road. City Center Drive will experience periodic traffic flow restrictions and detours during times of construction. Please anticipate this and know that there will be short-term inconveniences during the project. Driveways will be accessible for local traffic, and we will work with the public to maintain access but would request your cooperation and understanding as improvements take place. You may have noticed other start-up activity for this project already taking place, which has included work in the project area by utility contractors, City personnel, and consultants which will continue until the start of construction. Generally, you can anticipate these workers to be wearing safety gear or have other identifying markings on their uniforms or clothing. **If you choose you may contact JKirsh@carmel.in.gov with your email address so that we can include you in upcoming project updates.** Also, we invite you to contact us via phone or email to discuss the project or set-up an appointment in the field if you desire. We welcome any correspondence or discussion and we appreciate your patience while we work to improve our City.

Sincerely,

Evan Smith
