ROAD PROJECT UPDATES

CARMEL, IN – Here are some traffic updates from the City of Carmel.

Executive Drive and Range Line Road – This roundabout is now open.

126th Street and Gray Road – This roundabout is scheduled to open by the end of the day today.

4th Avenue SW and Main Street – The roundabout is scheduled to reopen today after the City completes maintenance work and added granite curbs. The roundabout will be resurfaced on Monday, so drivers should expect minor delays.

River Road Project – This road reconstruction project is experiencing some utility-related delays that make it unsafe to reopen. We are working through these issues and, weather permitting, anticipate opening River Road to traffic by mid-December.

Veterans Way at Carmel Civic Square – This street adjacent to City Hall is currently closed through the end of December as overhead power lines are being buried from City Hall to Midtown. Access to the South Parking Lot at City Hall is limited to vehicles accessing the lot off of Southbound Range Line Road near the new Executive Drive roundabout. Access to parking spots on the north side of City Hall is still possible by using Gradle Drive.

Spring Mill Road Project – Work continues on the project and we anticipate opening Spring Mill Road to traffic by mid-December. Final landscaping will take place in the spring.
